Profile

I'm Ryan Cooke, demonstrating a strong aptitude for computers since age 11 through self-directed programming and rapid learning.

Through extensive involvement with startups, I've gained a profound understanding of diverse roles. This has equipped me to take on various responsibilities as required, ensuring adaptability and proficiency in tasks across different domains.

In corporate settings like Ebuyer & Outsourcify, I've recognized the significance of maintaining a proactive, solution-oriented mindset. This not only enhances task efficiency but also fuels my commitment to continuous learning and improvement.

With these skills and my proficiency in multiple languages, I am confident in providing substantial value to any team. As a highly motivated and adaptable individual, I am poised to contribute effectively to any project or organization seeking these qualities.

Currently Doing

Relocated back to Thailand and Open to new opportunities

Skills Appendix

pr: Projects

1. **JAVASCRIPT** Javascript (20 prs)
2. **NODE** Node.js (12 prs)
3. **GIT** Git Version Control (08 prs)
4. **MYSQL** MySQL (16 prs)
5. **VueJS** Vue.js (14 prs)
6. **css** Cascading Style Sheets (13 prs)
7. **HTML** HTML (13 prs)
8. **QA** Quality Assurance and Testing (12 prs)
9. **INT** Internationalization (11 prs)
10. **TYPESCRIPT** TypeScript (19 prs)
11. **PHP** PHP (9 prs)
12. **PM** Project Management (8 prs)
13. **C-INTER** Client / Customer Interaction (7 prs)
14. **SH-INTER** Stable Holder Interaction (6 prs)
15. **BASH** Bash (6 prs)
16. **INFDESIGN** Ant Design (5 prs)
17. **WEB-SC** Web Scraping (5 prs)
18. **REACT-NATIVE** React Native (5 prs)
19. **BD** Big Data (4 prs)
20. **AWS** Amazon Web Services (4 prs)
21. **MENTORING** Mentoring (4 prs)
22. **CLI** Command Line Interface (4 prs)
23. **DOCKER** Docker (3 prs)
24. **NEXTJS** Nuxt.js (3 prs)
25. **BA** Data Aggregation (3 prs)
26. **SCRUM-MASTER** Scrum Master (3 prs)
27. **FIREBASE** Firebase (3 prs)
28. **GLUE** Glue (3 prs)
29. **VITE** Vite (2 prs)
30. **EXPRESS-JS** Express (2 prs)
31. **GCP** Google Cloud Platform (2 prs)
32. **AZURE** Microsoft Azure (2 prs)
33. **VA** Vagrant Docker Provisioner (2 prs)
34. **DOC** Documentation (2 prs)
35. **G-APIs** Google APIs (2 prs)
36. **C#** C# / .NET (2 prs)
37. **SASS** Sass - Stylesheet language (2 prs)
38. **PROG** Progressive Web App (2 prs)
39. **QT** Qt (2 prs)
40. **C++** C++ (2 prs)
41. **SYMPHONY** Symphony (2 prs)
42. **NEO4J** Neo4J (1 prs)
43. **POSTGRES** (1 prs)
44. **TAILWIND** Tailwind CSS (1 prs)
45. **REACTJS** React JS (1 prs)
46. **VENDUREJS** Vendure IO (1 prs)
47. **OTM** Google Tag Manager (1 prs)
48. **PAYLOAD-CMS** Payload CMS (1 prs)
49. **ANSIBLE** Ansible (1 prs)
50. **LESS** Less (1 prs)
51. **FLUTTER** Flutter (1 prs)
52. **PTS** Abstract Syntax Tree (1 prs)
53. **TRANSPILER** Transpiler (1 prs)
54. **REDS** Redis DB (1 prs)
55. **REACT-WEB** React Web (1 prs)
56. **ETHERJS** Ethers.js (1 prs)
57. **TUI** Terminal User Interface (1 prs)
58. **DYNAMO** Amazon DynamoDB (1 prs)
59. **LARAVEL** Laravel (1 prs)
60. **CRYPTOGRAPHY** Cryptography (1 prs)
61. **ELECTRON** Electron (1 prs)
62. **FINTECH** Financial Technology (1 prs)
63. **OCR** Optical Character Recognition (1 prs)
64. **ELASTICSEARCH** Elasticsearch (1 prs)
65. **WORDPRESS** WordPress (1 prs)
66. **CH-EXT** Chrome Extension (1 prs)
67. **XML** XML (1 prs)
68. **S50** (1 prs)
69. **ANGULARJS** (1 prs)
70. **BAZAAR** Bazaar Version Control (1 prs)
71. **C** C Language (1 prs)

Experience

All of the jobs that involved any type of development were mostly senior positions and had similar responsibilities. I will summarize them here:

- Software Testing
- Bug Fixing
- Infrastructure Architect
- Assembled great teams (Management based roles)

MultithreadLabs.io

Date: 04/2021 - present

Multithread Labs is a B.OI registered web agency. Most of the projects that I'm currently involved with are done with this company.

Role: IT Solutions Analyst

Location: Bangkok, Thailand

Skills: **SH-INTER** **C-INTER** **PM**

Responsibilities:

- Project Development Manager
- Senior Developer
- O & A

Key Achievements:

- Solidified multiple partners and clients
- Successfully took over prior high profiled clients and still do consulting
- Personally improved speed and efficiency of my clients website by 10X (LMC Auto)

Projects:

These projects can be client projects, internal products, consultant roles or contracted positions

- Flowtech.co.uk

Type: **Consulting / Full Time On Site Contract**

I had the privilege of serving as Head of IT for a leading UK-based company over the past year. This role was both exciting and transformative, offering me the invaluable opportunity to collaborate with talented teams across the UK and Austria. Working with Flowtech, a prominent leader in their industry, was an honor, and I'm truly grateful for the experience and opportunities it provided.

Role: Contracted Head of IT

Location: Skelmersdale, UK

Skills: **PM** **QA** **NODE** **NEXTJS** **TYPESCRIPT** **JAVASCRIPT** **POSTGRES** **TAILWIND** **BASH** **DOCKER**
GIT **REACTJS** **VENDURE-IO** **CSS** **HTML** **VITE** **VueJS** **NEXT** **INFDESIGN** **WEB-SC** **OTM** **INT**
PAYLOAD-CMS

Responsibilities:

- Scoping out new functionality
- Full Stack Developer (ReactJS, TypeScript, Tailwind CSS, Node, Bash, Docker)
- Creating and updating documentation

Key Achievements:

- Successfully got the new white-label solution through to the first MVP
- Assisted multiple internal departments with day to day operation solutions

- Eezze.io

Type: **Internal Project**

For the past three years, my team and I have dedicated ourselves to a project called Eezze. It's a versatile cross-platform framework that simplifies development across major areas like REST Webservices, and Cron. This framework seamlessly integrates with an AI-powered web UI, functioning as a low-code/no-code solution. Moreover, it provides a suite of tools to automate and integrate various aspects of the software development lifecycle, constantly expanding its capabilities. Our platform boasts a human-curated template store, complemented by AI intelligence, allowing for the creation of projects through simple prompts while retaining full customization options.

Role: Project Manager & Senior Architect & Senior Backend Typescript

Location: Bangkok, Thailand

Skills: **PM** **QA** **NODE** **EXPRESS-JS** **TYPESCRIPT** **JAVASCRIPT** **MYSQL** **BD** **BASH** **DOCKER**
ANSIBLE **REACT-NATIVE** **HTML** **CSS** **ETHERJS** **TUI** **BA** **INT** **GIT**
FLUTTER **PTS** **TRANSPILER** **WEB-SC** **MT** **VAGRANT**

Responsibilities:

- Conceptualize and implement a cross platform TypeScript framework. This framework has to seamlessly work on servers and various cloud vendors
- Full Stack Developer (Vue, Node, redis, ethers.js, bash, CLI tool interfaces, Docker, Flutter, Figma Plugin)
- Create a transpiler from a OML like language to flutter (written in Node)
- Create a robust UI to interface with our Framework

Key Achievements:

- Created a tool on my own initiative on holiday that ended up saving the company 100s of hours of work and helped them better manage a billion dollars of assets
- Created a tool that enabled the company to find over 30 critical bugs just before v2 launch

Seven Peaks Software

Date: Early 2020 - 04/2021

At Seven Peaks Software, one of Thailand's top web agencies, I joined just after the initial COVID lockdowns hit Thailand. I was one of three project managers, handling everything from gathering customer needs to resolving issues between clients and the development team. I worked with some big names like CPP Group, Banana IT, and ERX Crypto Exchange. Sometimes, I even pitched in as a developer because of my coding background. But then, I left to start my own thing – my current project, Eezze.io.

Role: Project Manager & Fullstack Developer

Location: Bangkok, Thailand

Skills: **PM** **C-INTER** **SH-INTER** **SCRUM-MASTER** **DOC** **QA** **MENTORING** **GIT** **C-INTER** **NODE** **GCP**
TYPESCRIPT **JAVASCRIPT** **G-APIs** **FIREBASE** **MYSQL** **VueJS** **HTML** **CSS** **BA** **INT** **GIT**

Responsibilities:

- Project Manager
- SCRUM Master
- Full Stack Developer (Node, C#)

Key Achievements:

- Successfully finished ERX crypto exchange
- Under my leadership and collaboration with the internal team we won contracts with CPP Group (Thailand's biggest oil company)
- I created an internal automation tool, which helped us automate the initialization of all the documentation and onboarding process of any new project that came into the company
